## P350X, P350W and P420X digital projectors

Easy to use and at the right price, P Series projectors provide all the essential features that you need to connect with your audience. Highlighted by enhanced connectivity and bright images, these models are ideal for entry-level integration environments such as corporate boardrooms, higher education classrooms and government training rooms.

### ESSENTIAL FEATURES FOR INTEGRATION

- With **XGA and WXGA native resolutions**, high brightness up to 4200 lumens and patented NEC technologies, P Series projectors display impressive image quality
- **Remarkable contrast ratio (2000:1)** enhances your image
- **Powerful 10-watt speaker** provides volume needed for large rooms
- **Vertical lens shift** provides for flexible installation
- **Terminal cover** easily hides cables to create a clean environment while deterring unintentional access
- **Versatile, color-coded connections** to computer, video sources and external monitor

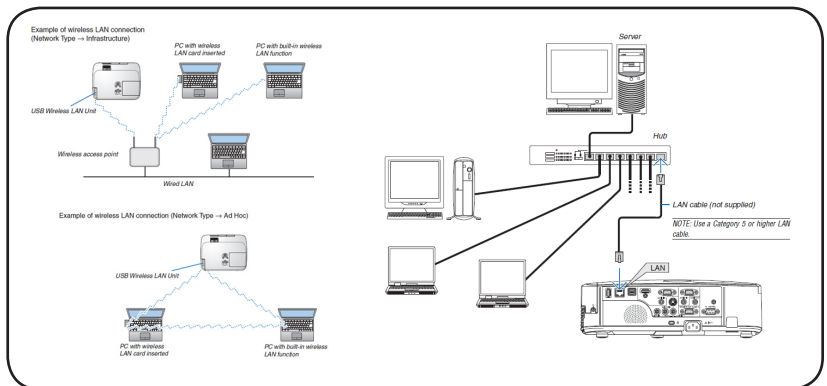

#### Top cover lamp change

Perform easy lamp changes without removal of the projector from the mount.

### ADVANCED NETWORKING CAPABILITIES

- **Integrated RJ45 connection** for quick connection to the LAN (10/100 base-T capability)
- **Remote diagnostics** enable the user to monitor and make adjustments to the projector remotely
- **PC CTL 4.0** controls the power switching input selection and other functions while managing lamp usage and a variety of other vital information over the network. Email notification and projector scheduling for better asset management is included with the software.
- **Image Express Utility dedicated projector software** (IEU 2.0; compatible with Windows or Mac operating systems) provides wired and wireless data transmission via peer-to-peer or over the network
  - Broadcast mode allows you to send information from one computer to several projectors
- **Image Express Lite dedicated projector software** provides wired and wireless data transmission via peer-to-peer or over the network
- **Windows Network Projector function** within Windows Vista connects directly to networked projectors without the need for additional proprietary software
- **Windows Remote Desktop function** allows you to control a networked computer by connecting a USB mouse and keyboard directly to the projector's USB input
- **Windows Media Connection and Network Drive functions** display multimedia files (.jpeg, .bmp, .png, .mpeg2 or .wmv9) stored on the Windows Media Connect server, in the Windows shared folder, or on a local network using the Viewer function—all without bringing your PC into the conference room
- **Crestron Roomview**

## DESIGNED WITH THE ENVIRONMENT IN MIND

- **Extended lamp life with ECO Mode™ technology** increases lamp life up to 5000 hours, while lowering power consumption
- **Power management** enables projector to automatically turn off when an incoming signal is not detected from any of the inputs
- **Auto Power On** via the RGB (15-pin) input connector when a signal is detected from a computer
- **Carbon savings meter** calculates the positive effects of operating the projector in ECO Mode, which is encouraged by an optional message at startup. A green ECO Mode button on the remote control makes the switch easy.
- **Quick start (3 to 4 seconds)** lets you begin presenting in seconds while quick shutdown (immediate power off with no cooling required after shutdown) ensures efficient energy usage
- **Sleep timer** can be set to automatically turn off the projector at set countdown times
- **Low power consumption** (0.2W in stand-by mode) minimizes energy costs
- **Direct power off** provides instantaneous shutdown of the projector

### 5000-hour filter life

NEC is committed to designing its products to provide long lifecycles. This commitment even extends to components within its products, including the improved filter. This virtually maintenance-free filter reduces the frequency at which cleaning is required, thereby decreasing your total cost of ownership.

### Active lens cover

This cover enables presenters to immediately mute the audio and video, then seconds later lower the lamp brightness to 25% for a short period of time.

## ADVANCED SOFTWARE FEATURES

### Geometric Correction

Projecting an image isn't confined to a standard flat screen or wall with the NEC P Series. Geometric correction allows these models to project an image on spheres, cylinders, corner angles and many more non-standard surfaces.

### Virtual Remote™ (DDC/CI)

Used over the VGA cable, you can control the projector directly from a computer without the need for additional control cables.

### Cornerstone

Enhanced keystone correction allows for horizontal, vertical and diagonal image correction for aligned images even when the projector is set up at an angle to the screen.

## GET CONNECTED WITH A WIDE SELECTION OF INPUTS

- **Dual computer inputs** ensure quick switching between presentations
- **Four audio inputs (two mini stereo [Comp1 & Comp2], R/L [RCA - shared by video sources] and HDMI)** make it easy to add sound to enhance your presentations

### Remote control

Easy control from remote allows you to adjust lamp mode, aspect ratio, volume and image all with the touch of a button.

### HDMI input

Among the P Series' wide selection of inputs is an HDMI w/HDCP for connecting to high-definition sources such as Blu-ray players, cable boxes, satellite receivers and personal computers.

### Variable audio-out

This input enables the remote control to be used to adjust volume of self-powered external speakers that are connected to the projector. In stand-by mode, the audio-out stays active, allowing the last input used to pass to the self-powered external speakers.

### USB Viewer

In instances when you'd prefer to leave your laptop behind for a presentation, P Series projectors can deliver a solution. Using the presentation conversion software included with your projector, simply place your file onto a USB drive and plug it into the projector's USB port. This allows you to display images stored as .jpgs from optional USB memory.

### USB input

Your connection options go even further with the P Series. Connect your laptop or PC directly to the projector using the USB port and a standard USB cable.

### Input panel cover

This optional accessory creates a clean look for your installation, while hiding signal cables and the power cord.

## BUILT-IN SOFTWARE

### Built-in wall color correction presets

These provide for adaptive color tone correction to display properly on non-white surfaces.

### DICOM SIM

DICOM Simulation enables users in medical environments to display accurate diagnostic images.

## UNIQUE FEATURES

**Advanced AccuBlend** ensures detailed images when non-native resolution sources are connected to the projector

**64-step image magnification** with location control

**Countdown sleep timer** can be set to automatically turn off the projector

## WARRANTY

Registered owners receive a 3-year parts and labor warranty including the first year of InstaCare. The lamp is covered for one year or 500 hours - whichever comes first. InstaCare provides the original owner one year of either limited 3-business-day repair/return or next-business-day exchange.

## IN THE BOX
